

IN THE SPECIFICATION

Please add the following paragraph on page 5, between lines 15 and 16 as follows:

FIG. 5 schematically shows, in cross-sectional view, a fourth embodiment of an enclosure, similar to the enclosure shown in FIG. 1, according to the present invention.

Please add the following paragraph on page 7, between lines 13 and 14 as follows:

Although the invention has been discussed in the above while referring to a single transducer, it is possible for the enclosure to comprise two or more transducers, for example three or four transducers. FIG. 5 schematically shows, in cross-sectional view, a fourth embodiment of an enclosure, similar to the enclosure shown in FIG. 1, according to the present invention, wherein a first transducer 2 and one or more further transducers 2A are shown. The first transducer may be a loudspeaker having a moveable cone, but other transducers may also be applied, for instance electrostatic transducers.
